A rectangular chalkboard with a dark green surface and a light-colored wooden frame. The words "Thank You" are written in white, serif font, centered on the board. The board is placed on a rustic wooden surface. A green leaf is visible in the top right corner, and an orange object is partially visible in the bottom left corner.

Thank
You

OUR START IN MANUFACTURING

Ready to Bring Bigger, Better, Faster And Stronger Projects Then Ever Before!!

LaFox Screw Products Inc. started way back in 1962 by Dominick Joy in the back of a lawn mower shop. In 1965 he bought land and moved the shop to its current location on North Gilberts Street. LaFox Screw was incorporated in 1974.

We are 3rd generation family owned and operated, with over 50 years' experience. LaFox has 25+ automatic Brown & Sharpe screw machines. We offer a variety of tooling services using automatic screw machines: forming, drilling, tapping, threading, knurling, slotting, and secondary operations. We pride ourselves on our quality in every part. We service orders from 1,000 to 10 million or more.

We continue to grow our long term, multi-generational relationships and constantly strive to evolve, expand, and improve to meet and exceed expectations.

8" x 1/2" Braided Ground Straps (1/4" Ring to 1/4" Ring)

Searching for 8" x 1/2" Braided Ground Straps (1/4" Ring to 1/4" Ring)?

Great! You landed on the right place.

Braided Ground Straps are heavy duty and corrosion resistant. The tinned copper braided wire offers durability, flexibility and maximum conductivity. Braided strands within each strap are woven and rolled flat to a 1/2" width.

Each end is terminated with a solder dipped ring terminal. Terminals are infused with RoHS solder to improve performance and tensile strength. This particular Braided Ground Strap connects a 1/4" ring terminal to a 1/4" ring terminal.

First, let's discuss the purpose of Ground Straps (also referred to as Grounding Straps).

Do Braided Ground Straps play a critical role with the safety of electrical devices, equipment, and people? Absolutely!

A ground strap protects you, the people around you and even your investments from electrostatic discharge (ESD).

Ground Straps are produced with a tinned copper braid wire terminated with metal connectors.

The braided wires are comprised of small strands of wires braided together. These braided wires provide the strength and toughness to handle rugged jobs. Yet, braided wires also serve as the conductor of choice due to its flexible use.

Tinned copper braids offer many benefits including excellent conductivity, resistance to corrosion as well as easy to solder for enhanced durability.

PROBLEM: Cross Flow Air Transmission

Moving air from one side of the room to the other can increase the
effective airborne transmission by pulling air directly across from
an infected individual to an uninfected individual.

Cross flow air transmission infections can
occur even if the source of the airflow is
from a sanitized air system because the
contamination source is in the room.

SOLUTION: The UVC Air Panel

[Crossflow Air Transmission](#)

WHAT IS A UVC AIR PURIFIER HYBRID LIGHT PANEL FIXTURE

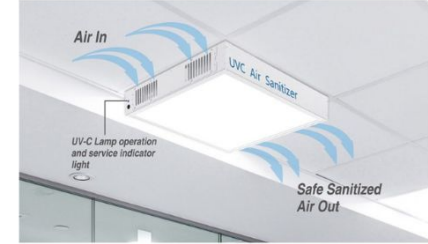

A UVC air purifier panel light fixture is a hybrid unit utilizing a standalone UVC deactivation chamber with airflow technology in conjunction with a LED-backlit flat panel light fixture. We call our fixture Cluvoire, which stands for *Clean UVC Air Sanitizing Luminaire*. However, with our hybrid approach to the system, it can be used with or without the backlight flat panel. The benefit of that is if you do not have a 2x4 or 2x2 fixture in the ceiling but have linear fixtures or pendants, this unit can be added to the application as a separate standalone system using the UVC deactivation equipment we provide.

[UVC AIR SANITIZER SERIES](#)

HOW DOES A UVC AIR PURIFIER WORK TO SANITIZE THE AIR

A UVC air purifier sanitizes the air or deactivates the mold, viruses, or bacteria airborne by drawing air into the system, passing through the UVC light chamber, then expelling the clean air down into the room. So as the air gets drawn into the chamber, we have the proper fluence intensity which is the time it takes to deactivate pathogens and expel the clean air back into the room.

With proper installation, the unit utilizes the current airflow from the established HVAC system and creates an airflow where the pathogens are rising up into the air. They get sucked into the fixture and then put back down towards the floor. So clean air is constantly being circulated down back toward the floor where people are talking and working.

WHERE CAN UVC AIR PURIFIER PANEL LIGHTS BE USED SAFELY?

Our UVC air panel light fixtures can be used in schools, banks, restaurants, retail stores, airports, transportation facilities, doctor and medical offices, dentists, reception areas, lobbies, hallways bathrooms, break rooms, offices, bullpens, meeting rooms, and dining areas, among others. Now, what you want to think here is a lot of the buildings back in the 40s 50s 60s 70s, even to this day, have zero airflows from the outside besides the main door, the windows are all sealed. You can't crack them open to get fresh air in and it's all reliant on the established HVAC system to pump in the air.

Due to the lack of fresh air and long turnaround time for air exchange through the standalone HVAC system, adding in the supplementary UVC air panel lights allow

SUMMARY OF THIS MANUFACTURING ECOMMERCE SUCCESS PRESENTATION

Where does a manufacturer turn when they want to improve their digital presence and results?

For some of these manufacturers the local Manufacturing Extension Partnership (MEP) is the logical choice.

Join us for this MFG eCommerce Success show where we will be talking with [Gautam Gundiah, PhD](#), President, [APL Engineered Materials, Inc](#), about APL Engineered Materials Inc's digital transformation and how they partnered with [IMEC Illinois](#), the Illinois MEP utilizing their "Grow Your Future" digital marketing program to improve their digital presence and results.

The team at IMEC helped over 130 manufacturers with their "Grow Your Future" initiative. We will be learning the strategies they helped APL Engineered Materials and other companies implement to get them ready for their digital future.

We will be reviewing how IMEC & other MEPs are helping manufacturers improve their results.
